

GBR LIQUID

(ORGANIC PLANT GROWTH ENHANCER FOR FOOD AND FLOWERING)

GBR LIQUID enhances soil fertility & increases soil microbes and resistance power of the plant to fight against pest and diseases. **GBR LIQUID** important for overall development of all crops food crops and flowering plants. **GBR LIQUID** can be used on any type of soil and food crops like wheat, maize, rice, millets and all type of pulses like chickpea, red, green, yellow and brown lentils, kidney beans and all types of flowering plants, gardens etc.

Nutrient Composition of GBR LIQUID

PROPERTIES	UNIT	GBR LIQUID (Minimum Value)
Appearance	-	LIQUID
pH	-	6.0
Nitrogen (N)	ppm	200
Phosphorus (P)	ppm	210
potassium (K)	ppm	10000
Total Organic Carbon (OC)	ppm	10500
Magnesium (Mg)	ppm	2500
Calcium (Ca)	ppm	3000
Iron (Fe)	ppm	23
Copper (Cu)	ppm	0.50
Lead (Pb)	ppm	1.95
Nickel (Ni)	ppm	0.05
Chromium (Cr)	ppm	0.05
Disclaimer:	Above analysis values may vary based on the critical weather effect	

Advantages

- Improves pH level of soil and enhances fertility.
- Improves physical, chemical & biological properties by reducing salts present in the soil.
- Root stimulator for flowering plants like roses and jasmine plants.
- It improves soil fertility and helps increase soil microbes and resistance power of the plant to fight against pests and diseases.
- Overall development of the crop, better flowering, fruit setting, thereby increasing the yield.

DOSAGE: -

- **FOLIAR SPRAY:** Get 4 liters for 1.0 bigha land,
- **DRIP IRRIGATION:** mix 4 liter per 200 liters of water.
